

There's a limit to landowners' rights

Every resident of Jefferson County should give thanks to Paul Carr, Jerry LeTendre and Urban Hirschey for trying to save our tax dollars, our health, our environment and our property values.

Foreign-owned companies with tax subsidies — hello, tax subsidies come from your tax dollars and mine — are able to offer landowners substantial sums of money to allow wind turbines on their fields.

Yes, every property owner had the right to decide what is best for his land, but when he chooses to put 400-foot towers across the road from me, it becomes my problem, and in my opinion, a hazard to my health, an unwanted tax burden and a very dangerous threat to wildlife, our river and Lake Ontario.

Let's get together and help these gentlemen.
